Risks

The value of investments and the income from them can go down as well as up and cannot be guaranteed.

Investments in a currency other than the shareholder's own currency, or in a fund that invests in securities denominated in currencies other than its own base currency, will be subject to the movements of foreign exchange rates, which may cause an additional favourable or unfavourable change in value. Consequently, investors may, on selling their shares, receive an amount greater or less than their original investment.

Collective investment funds are generally medium to long-term investments.
